Nishanth Pendyala

Student

I am a coding enthusiast and possess a great love for computer technology. Believing in oneself and Finding solutions is something which I tend to follow in my personal as well as professional life. I can't wait to use my existing knowledge to learn new technologies, methodologies, and meet motivated and energetic teammates.

PERSONAL PROJECTS

Real-time face mask Detection (01/2022 - 02/2022)
- This application is developed in Python using Keras, Tensorflow, MobileNet, and OpenCV.
- Wearing a mask is extremely necessary for current conditions due to the Covid pandemic, Hence by using this application we can detect whether the person is wearing a mask or not.
- This system can be used in real-time applications which require face-mask detection for safety purposes due to the outbreak of Covid-19.
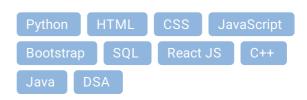

E-Commerce websites (11/2021 - 12/2021)
- The project is based on web development developed by using HTML, CSS, Bootstrap, and JavaScript.
- The Project was to create an enterprise-level application from the scratch adhering to user requirements.
- The application helps the users to book or buy an item. There are separate portals for each role.

Hotel Management System (09/2020 - 10/2020)
- It is a console-based project developed using C++ to adhere to the hotel requirements.
- It covers macros, classes, objects, arrays, functions, loops, and structure.
- We can be able to access many sections like Manage rooms, Check-in & Check-out, Available rooms, etc.,
